

NOVEL H1N1 INFLUENZA (SWINE FLU)

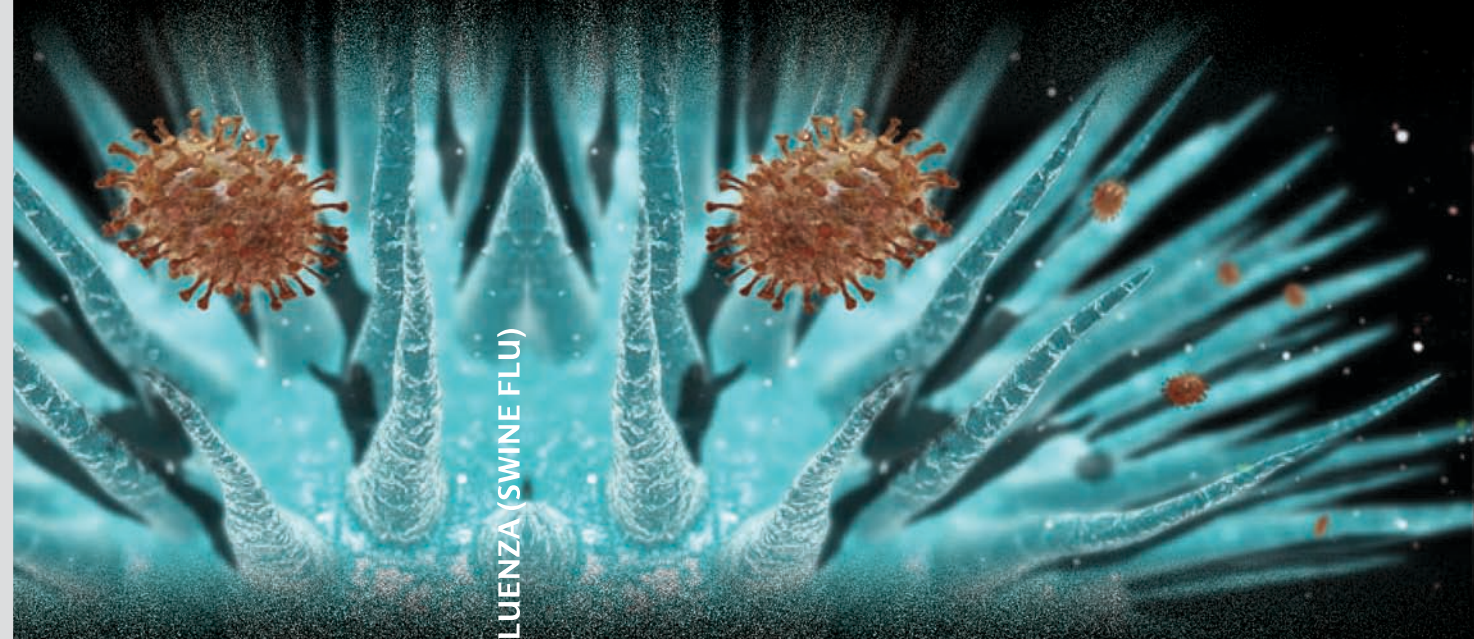

Dr. S. Abdul Azeez MBBS, DPH

H1N1 influenza (Swine flu) is the modern pandemic causing major threat to human population especially to certain high risk groups like persons with chronic illnesses, extremes of age, pregnancy etc. This book covers all important aspects of swine flu such as the history, global distribution, statistical data, clinical manifestations, diagnosis and treatment. Special emphasis is given to the preventive measures. I hope this will be a useful reference book for the clinicians, medical students and other health staff apart from the general public.
